

# CYBERKNIFE® M6™ SERIES

Precisely Maximize Dose, Minimize Side Effects and Maximize Patient Comfort

The CyberKnife System, the premier solution for robotic radiosurgery and SBRT, now extends its accuracy and precision to radiation therapy – allowing you the freedom to choose the very best treatment for each of your patients, with confidence and without compromise.

## UNMATCHED CLINICAL EXCELLENCE

- Treats broader range of patients and indications
- System design extends the reach of non-isocentric, non-coplanar beams
- Precisely sculpts dose to spare healthy tissue while maintaining sub-millimeter accuracy – even for targets that move during respiration

## SUPERIOR PATIENT EXPERIENCE

- Efficient treatment times make treatments more accessible and comfortable
- Collimation and dose shaping to meet your patient's needs
- Indication-specific clinical packages deliver personalized treatment for each of your patients

## OUTSTANDING EFFICIENCY AND EASE OF USE

- Brings new patient populations and clinical opportunities
- Workflow-based User Interface maximizes efficiency and simplifies treatments
- Attracts informed patients

PRECISION MATTERS
